Tech Skills Needed

THE AI OFFICE TOOLKIT

How to Use This Guide

You don't need to be a prompt engineer. Just copy, fill in the [brackets], and paste into any AI tool.

3 Steps to Get Great Results

1 Copy the prompt

Find the prompt for your task. Copy the entire text in the blue/coloured box.

2 Fill in the [brackets]

Replace anything in [square brackets] with your specific details — name, topic, context, tone, etc.

3 Paste and send

Paste into ChatGPT, Microsoft Copilot, Google Gemini, or any AI tool and hit enter. Refine if needed.

Pro tip: Add context for better results

At the start of any prompt, you can add: "I work at a [company type] as a [your role]. Keep the tone [formal/casual/professional]." This makes every prompt more accurate.

Variable	What to replace it with	Example
[topic]	The subject you're working on	quarterly sales review, IT security policy
[recipient]	Who receives your message	my manager, the client, HR department
[tone]	How formal you want it	formal, friendly, professional, direct
[length]	How long the output should be	3 sentences, 1 page, 5 bullet points
[context]	Background information relevant to the task	paste in the document, email chain, notes
[number]	A specific count	3 options, 10 questions, 5 risks

Works with all major AI tools

ChatGPT

Category 1: Writing Professional Emails

Stop staring at a blank email. These prompts get you a polished draft in seconds — just fill in the details.

01 Follow-up after no reply

Use when: A client, colleague, or vendor hasn't responded in 3–7 days

- Write a polite follow-up email to [recipient] regarding [topic]. I sent an email on [date] and haven't received a response. Keep it brief, friendly, and non-pushy. End with a clear next step.

02 Declining a request professionally

Use when: You need to say no without damaging the relationship

- Write a professional email declining [request/invitation] from [recipient]. Reason for declining: [reason]. Keep it respectful, offer an alternative if possible, and maintain the relationship.

03 Requesting an extension or deadline change

Use when: You need more time on a deliverable

- Write an email to [recipient/manager] requesting an extension for [task/project]. Original deadline: [date]. Proposed new deadline: [date]. Reason: [brief reason]. Keep it accountable — don't make excuses, just be clear and solution-focused.

04 Escalation email

Use when: An issue isn't being resolved and needs senior attention

- Write a professional escalation email to [senior person/manager] about [issue]. Background: [brief context]. Steps already taken: [what you tried]. I need [specific resolution]. Keep the tone factual, not emotional.

05 Apologising for a mistake

Use when: You need to own an error professionally

- Write a professional apology email to [recipient] for [mistake/delay/oversight]. Acknowledge the error clearly, briefly explain what happened, state what you're doing to fix it, and reassure them it won't recur. Tone: sincere, not defensive.

06 Cold introduction email

Use when: Reaching out to someone you've never spoken to

- Write a concise cold introduction email to [recipient] at [company]. My name is [name] and I work as [role] at [company]. Purpose: [what I want — collaboration, advice, a meeting]. Keep it under 5 sentences. Be specific about why I'm contacting them.

07 Thanking someone after help

Use when: Someone went out of their way for you

- Write a warm but professional thank-you email to [name] for [specific help they gave]. Mention how it helped me: [specific outcome]. Keep it genuine and not over-the-top. 3–4 sentences max.

08 Summarising a long email thread

Use when: An email chain has gotten confusing and needs a recap

- Summarise this email thread and write a clean summary email I can send to all parties. Extract: the key decisions made, open action items, who is responsible for each, and next steps. Here is the thread: [paste thread]

09 Rewriting an email to sound more professional

Use when: Your draft sounds too casual or unclear

- Rewrite this email to sound more professional and clear. Improve grammar, tone, and structure. Keep the core message the same. Here is my draft: [paste draft]

10 Announcing a change to a team

Use when: Communicating a policy, process, or personnel change

- Write an internal announcement email for the team about [change/update]. What's changing: [describe]. When it takes effect: [date]. Why it's happening: [reason]. Any action required from the team: [actions]. Tone: clear, positive, reassuring.

Category 2: Summarising Documents and Content

Turn long documents, reports, and articles into clear, usable summaries in seconds.

11 Summarise a long document

Use when: You have a long report, policy, or article to digest quickly

- Summarise this document in [5 bullet points / 2 paragraphs / 1 page]. Focus on: the main purpose, key findings or decisions, and any action items. Audience: [who will read this]. Here is the document: [paste content]

12 Executive summary

Use when: Creating a one-page summary for senior leadership

- Write an executive summary of the following document for senior leadership. Include: situation overview, key findings, recommendations, and next steps. Max 250 words. Here is the content: [paste content]

13 Extract key action items

Use when: Reading meeting notes, emails, or reports for to-dos

- Read the following content and extract only the action items. For each one, list: what needs to be done, who is responsible (if mentioned), and the deadline (if mentioned). Format as a table. Here is the content: [paste]

14 Compare two documents

Use when: You need to find differences between two versions or proposals

- Compare these two documents and identify the key differences. Focus on: changes in scope, tone, numbers, and recommendations. Present the comparison as a table with Document A vs Document B. Document A: [paste]. Document B: [paste]

15 Summarise for a non-technical audience

Use when: You need to explain technical content to leadership or clients

- Summarise this technical document for a non-technical business audience. Avoid jargon. Use plain language. Explain what it means in practice and why it matters. Max [length]. Here is the document: [paste]

16 Create a TL;DR

Use when: You want a 2–3 sentence bottom-line summary

- Write a TL;DR (too long; didn't read) summary of this content in exactly 2–3 sentences. Capture the single most important point someone needs to know. Here is the content: [paste]

17 Extract risks and concerns

Use when: Reviewing a proposal, contract, or report for potential problems

- Read the following document and list all risks, concerns, or potential problems mentioned or implied. Rate each as High / Medium / Low risk. Suggest a mitigation for each. Here is the document: [paste]

18 Summarise a meeting recording transcript

Use when: You have a raw Teams/Zoom transcript

- Here is a meeting transcript. Summarise it with: 1) A 3-sentence overview of what was discussed 2) Key decisions made 3) Action items with owner names 4) Any unresolved questions. Here is the transcript: [paste]

19 Bullet-point a dense paragraph

Use when: You need to make dense content readable

- Convert this dense paragraph into clear, scannable bullet points. Each bullet should be one idea. Use plain language. Here is the paragraph: [paste]

20 Identify the main argument

Use when: Reading a long proposal or research paper

→ Read this document and identify: 1) The central argument or recommendation 2) The top 3 pieces of evidence supporting it 3) Any counterarguments mentioned 4) The conclusion. Here is the document: [paste]

Category 3: Writing Reports and Documents

Build structured, professional reports faster — from status updates to full project reports.

21 Weekly status report

- Write a professional weekly status report for [project/role]. This week I completed: [list]. In progress: [list]. Blockers: [list or "none"]. Next week's priorities: [list]. Audience: [manager/team]. Keep it concise and structured.

22 Project proposal

- Write a professional project proposal for [project name]. Include: problem statement, proposed solution, scope, timeline, resources needed, expected benefits, and risks. Audience: [stakeholders]. Format as a formal document.

23 Post-mortem / lessons learned report

- Write a post-mortem report for [project/incident]. Include: what went well, what went wrong, root causes, impact, and recommendations to prevent recurrence. Context: [paste notes]. Tone: factual, blame-free, improvement-focused.

24 Business case for a new tool or investment

- Write a business case to justify purchasing [tool/service/resource]. Include: current problem, proposed solution, cost estimate, expected ROI or benefits, risks of not acting, and a recommendation. Audience: finance/senior leadership.

25 Incident report

- Write a professional incident report for [incident type] that occurred on [date]. Include: timeline of events, immediate impact, response actions taken, root cause, and corrective actions. Keep it factual and chronological.

26 Competitive analysis

- Help me write a competitive analysis comparing [our product/service] against [competitor 1] and [competitor 2]. Compare on: pricing, features, strengths, weaknesses, and target audience. Present as a table followed by a paragraph summary.

27 Convert bullet notes into a formal report section

- Convert these rough bullet point notes into a polished, professional report section. Add transitions, fix grammar, and make it formal. Section heading: [heading]. My notes: [paste notes]

28 SWOT analysis

- Create a detailed SWOT analysis for [company/project/team/strategy]. For each of the four areas — Strengths, Weaknesses, Opportunities, Threats — provide 4–5 specific, realistic points based on this context: [paste context or describe situation]

29 Monthly management report intro

- Write a professional introduction paragraph for a monthly management report for [month]. Key highlights this month: [list 3–4 points]. Overall performance: [positive/mixed/challenging]. Tone: confident, factual, forward-looking.

30 Policy document draft

- Draft a professional policy document for [policy topic] for [company/department]. Include: purpose, scope, policy statement, responsibilities, procedures, and compliance requirements. Tone: formal and unambiguous.

Category 4: Meeting Preparation and Follow-up

Be the most prepared person in every meeting — without spending hours getting ready.

31 Create a meeting agenda

- Create a structured meeting agenda for a [duration] meeting about [topic]. Attendees: [roles]. Goal of the meeting: [goal]. Include: welcome/intro, agenda items with time slots, discussion points for each, and a closing/next steps section.

32 Generate questions to ask in a meeting

- I have a [type of meeting] about [topic] with [who]. Generate [10] smart, relevant questions I should ask. Context about the meeting: [paste any relevant background]. Include both clarifying questions and strategic ones.

33 Write meeting minutes

- Convert these meeting notes into formal meeting minutes. Include: meeting date, attendees, agenda items discussed, key decisions, action items with owners and deadlines, and next meeting date. Notes: [paste notes]

34 Prepare for a difficult conversation

- Help me prepare for a difficult conversation with [role/relationship] about [issue]. Give me: how to open the conversation, key points to cover, how to respond if they get defensive, and how to end constructively. My goal: [what outcome I want].

35 Post-meeting follow-up email

- Write a professional follow-up email after our meeting about [topic] on [date]. Summarise: what was decided, action items with owners, and next steps. Recipients: [names/roles]. Tone: clear and action-oriented.

36 Talking points for a presentation to leadership

- Give me 5 clear talking points for presenting [topic] to senior leadership. Each talking point should have: a headline sentence, 2 supporting facts or details, and a so-what (why it matters). Background: [paste context]

37 Brainstorm meeting — generate ideas

- Generate [15] creative but practical ideas for [problem/challenge]. For each idea: state it in one sentence and give a one-line explanation of how it works. Context: [describe the problem]. Don't filter — include bold and conservative ideas both.

38 One-on-one preparation

- Help me prepare for a one-on-one meeting with my [manager/direct report]. Topics I want to cover: [list]. Help me frame each topic clearly, anticipate their likely response, and suggest what I should ask for or offer in each case.

39 Summarise a presentation into key messages

- Read this presentation content and extract the 3–5 key messages the audience should remember. For each: state the message in one sentence and explain why it matters. Content: [paste slides text or notes]

40 Handle objections in a meeting

- I'm proposing [idea/change/project] in a meeting. Likely objections I'll face: [list 3 objections]. For each objection, give me a confident, data-driven response I can use. Keep responses concise — 2–3 sentences each.

Category 5: Explaining Technical Concepts Simply

Bridge the gap between technical teams and business stakeholders.

41 Explain like I'm 10

- Explain [technical concept] as if you're explaining it to a 10-year-old. Use an everyday analogy. Avoid all technical jargon. Keep it under 5 sentences.

42 Explain to a non-technical manager

- Explain [technical concept/system/finding] to a business manager who has no technical background. Focus on: what it is, why it matters to the business, and what action (if any) is needed. No acronyms without explanation.

43 Create an FAQ for a technical change

- Write an FAQ document about [technical change/system update] for non-technical staff. Include [8–10] questions they're likely to ask, with clear plain-language answers. Context: [describe the change]

44 Translate a technical error into plain language

- Explain what this technical error or message means in plain English. What caused it? What should the user do next? Keep it simple and actionable. Error: [paste error message or technical finding]

45 Write a glossary of terms

- Create a plain-language glossary for these [number] technical terms used in [project/domain]. Each definition should be 1–2 sentences, jargon-free, with a real-world example where possible. Terms: [list terms]

46 Explain the "so what" of data

- Here is some data or analysis: [paste data/findings]. Explain what this means in business terms. What is the key insight? What decision or action does this support? Write 3–4 sentences a senior leader would find useful.

47 Analogy for a complex process

- Create a simple, memorable analogy that explains [complex process or concept] to someone with no background in [field]. The analogy should make the core idea immediately obvious.

48 Write a one-pager explanation

- Write a one-page plain-language explainer about [topic] for [audience]. Include: what it is, why it matters, how it works (in simple terms), and what it means for [audience specifically]. No more than 400 words.

49 Explain pros and cons simply

- Explain the pros and cons of [technology/approach/decision] for a non-technical decision maker. 4–5 pros and 4–5 cons. Each point: one sentence, no jargon, business-focused impact.

50 Write a change communication message

- Write an all-staff communication about [technical change]. Explain: what is changing, why, when it happens, how it affects them day-to-day, and who to contact with questions. Tone: clear, calm, reassuring. No technical jargon.

Category 6: Data Analysis and Insights

51 Interpret a dataset

- Here is a dataset: [paste data or describe it]. Identify the top 3 insights. What trends do you see? What is surprising? What action would you recommend based on this data?

52 Write commentary for a chart

- Write 2–3 sentences of professional commentary for this chart/graph to include in a report. Describe what it shows, highlight the most important point, and state what it means. Chart data: [describe or paste values]

53 Identify anomalies

- Review this data and flag any anomalies, outliers, or unexpected values. For each one: what is unusual, why it might have occurred, and whether it needs investigation. Data: [paste]

54 Create a data-driven recommendation

- Based on this data, write a clear, concise recommendation for [decision]. Structure it as: situation (1 sentence), data insight (2 sentences), recommendation (1 sentence), expected outcome (1 sentence). Data: [paste]

55 Suggest Excel formulas for a task

- I need to do the following in Excel: [describe task]. Suggest the best formula(s) to use, explain what each part does, and give an example of how to write it for my data structure: [describe columns/layout]

56 Write a data quality check list

- Create a data quality checklist for reviewing [type of dataset] before it is used in a report or analysis. Include checks for: completeness, accuracy, consistency, duplicates, and formatting. Make it practical and actionable.

57 Dashboard summary paragraph

- Write a concise management summary paragraph (100 words max) for a dashboard showing: [list your metrics and their values]. Highlight what's on track, what needs attention, and any key trend. Tone: factual and direct.

58 Forecast commentary

- Based on this historical data: [paste], write a short commentary on what the trend suggests for the next [time period]. Include assumptions you're making. Keep it honest — acknowledge uncertainty where it exists.

59 Turn a table into a narrative

- Convert this data table into a narrative paragraph suitable for a management report. Focus on the story the numbers tell — what changed, what's notable, what it means. Table: [paste]

60 Root cause analysis

- Help me perform a root cause analysis for [problem]. Use the 5 Whys method. Start with the problem statement and work backward to the underlying cause. Problem: [describe]. Context: [paste relevant data or background]

Category 7: Presentations and Slides

61 Create a slide outline

- Create a [number]-slide presentation outline on [topic] for [audience]. For each slide: slide title, 3 bullet points of content, and the key message the slide should leave the audience with. Goal of presentation: [goal]

62 Write slide speaker notes

- Write speaker notes for this slide content. The notes should: expand on each bullet point, include a transition to the next slide, and include a talking point or example not on the slide. Slide content: [paste]

63 Write an opening hook for a presentation

- Write a compelling opening for a presentation about [topic]. Include: a surprising statistic or question, why this matters to [audience], and a one-sentence preview of what they'll learn. Duration: 30–60 seconds when spoken.

64 Closing call-to-action slide

- Write the content for a closing slide for a presentation on [topic]. Include: a one-line summary of the key message, 3 clear next steps for the audience, and a call to action. Tone: motivating and clear.

65 Simplify a text-heavy slide

- This slide has too much text. Rewrite it with: a clear headline (max 8 words), 3–4 concise bullet points (max 10 words each), and one key takeaway sentence at the bottom. Original content: [paste]

66 Suggest visuals for slides

- For each of these slide topics, suggest what type of visual would best communicate the content (e.g., bar chart, timeline, process diagram, icons, table). Explain why for each. Slides: [list topics]

67 Convert a report into slides

- Convert this report into a [number]-slide deck. Each slide should have: a title, 3 key points, and one clear message. Group related content logically. Focus on what leadership needs to know, not everything. Report: [paste]

68 Q&A preparation

→ I'm presenting [topic] to [audience]. Generate [10] tough questions they might ask. For each question, give me a confident 2–3 sentence answer. Focus on challenges, risks, costs, and feasibility questions.

69 Write a story for a slide

→ Write a brief real-world story or scenario (3–4 sentences) that illustrates this concept for a presentation slide: [concept]. The story should be relatable to [audience] and make the abstract idea concrete.

70 Before/after improvement slide

→ Create content for a "Before vs After" slide showing the improvement from [old situation] to [new situation]. Each side should have 3–4 bullet points. Make the contrast clear and impactful.
Context: [describe the change]

Category 8: HR and People Management

71 Write a self-appraisal

- Write a professional self-appraisal for my annual performance review. My role: [role]. Key achievements this year: [list]. Areas I want to grow in: [list]. Tone: confident, specific, and professional. Include measurable outcomes where possible.

72 Give constructive feedback

- Help me write constructive feedback for [name/role] about [issue or behaviour]. Use the SBI model (Situation, Behaviour, Impact). Be specific, avoid personal criticism, and end with a clear suggestion for improvement.

73 Write a job description

- Write a job description for a [role title] at a [company type]. Include: role summary, key responsibilities (8–10), required qualifications, preferred skills, and what makes this role interesting. Tone: professional but engaging.

74 Interview questions

- Generate [15] strong interview questions for hiring a [role]. Include a mix of: behavioural (tell me about a time...), situational (what would you do if...), and skills-based questions. Also suggest what a good answer to each looks like.

75 Write a recognition message

- Write a genuine recognition message for [name] to share with the team or in a performance review. What they did: [specific achievement]. Why it mattered: [impact]. Tone: warm, specific, and not generic. 3–4 sentences.

76 Development plan for a team member

- Create a 6-month development plan for [role] who wants to grow in [skill/area]. Include: 3 learning goals, suggested resources or activities for each, how to measure progress, and a monthly check-in structure.

77 Onboarding checklist

- Create a 30-60-90 day onboarding checklist for a new [role] joining [team/company]. For each phase: list 5-7 specific tasks, meetings, or goals the person should complete. Focus on becoming productive and building relationships.

78 Address a performance concern

- Help me draft talking points for a performance conversation with [role] about [concern]. The goal is to address the issue clearly without being harsh, understand root causes, agree on improvements, and maintain the working relationship.

79 Resignation response email

- Write a professional response to [name]'s resignation. Acknowledge the resignation, express genuine appreciation for their contributions, confirm the last working day, and outline the handover process needed. Tone: gracious and professional.

80 Team survey questions

- Create [10] team survey questions to assess [team morale/engagement/communication/specific topic]. Questions should: be specific, easy to answer, and actionable. Include a mix of rating scale and open-ended questions.

⚡ Category 9: Problem Solving and Thinking

81 Devil's advocate

- Play devil's advocate against this plan: [describe plan]. Give me [5] strong arguments against it that a sceptic or critic would raise. Be specific and realistic — not just generic concerns.

82 Force-rank options

→ I have these [number] options: [list them]. Help me force-rank them by evaluating each against these criteria: [list 3–4 criteria]. Present as a scoring table and recommend the best option with justification.

83 Second-order consequences

→ What are the second and third-order consequences of [decision/action]? Think beyond the immediate obvious effect. What happens next? And after that? Give me a chain of likely consequences, including unintended ones.

84 Pre-mortem analysis

→ Imagine it is 12 months from now and [project/plan] has failed completely. What went wrong? List the [5–7] most likely reasons for failure. For each, suggest a preventive action I can take now.

85 Reframe a problem

→ I'm stuck on this problem: [describe]. Give me [3] completely different ways to think about or frame this problem. Each reframe should reveal a different set of possible solutions.

86 Write a decision memo

→ Write a one-page decision memo for [decision]. Include: background (2 sentences), options considered (3), recommendation and rationale, risks and mitigations, and approval requested. Context: [paste details]

87 Stress-test an assumption

→ My plan relies on these key assumptions: [list]. For each assumption: how likely is it to be wrong? What would happen if it were wrong? What can I do to validate it before committing?

88 Prioritisation matrix

→ Here is my list of tasks or projects: [list]. Plot them on a 2×2 matrix of Impact vs Effort and categorise each as: Quick Win (high impact, low effort), Major Project (high impact, high effort), Fill-In (low impact, low effort), or Avoid (low impact, high effort).

89 Create a communication plan

→ Create a stakeholder communication plan for [project/change]. For each stakeholder group: [list groups], specify: what they need to know, when, how (email/meeting/report), and who is responsible. Format as a table.

90 Write a proposal to reject a bad idea

→ Help me write a professional note explaining why [bad idea/proposal] should not be pursued. Structure it as: acknowledging the intent, explaining the concerns (3–4 specific points), and proposing a better alternative. Tone: constructive, not dismissive.

Bonus: 10 Power Prompts

These work across any task and will become your most-used prompts.

91 Make this shorter

- Make this text 50% shorter without losing any important information. Keep the professional tone. Here is the text: [paste]

92 Make this more persuasive

- Rewrite this text to be more persuasive and compelling. Use evidence-based language, address the reader's concerns, and end with a clear call to action. Keep the core message the same. Text: [paste]

93 Check this for logical gaps

- Review this argument or plan for logical gaps, missing evidence, or weak reasoning. What assumptions are being made? What evidence is needed but absent? What would a critic immediately challenge? Text: [paste]

94 Give me 3 different versions

- Write 3 different versions of this: [text/email/message]. Version 1: formal. Version 2: conversational. Version 3: direct and brief. I'll choose the one that fits best. Original: [paste]

95 What am I missing?

- Here is my plan/document/analysis: [paste]. What important things am I missing? What haven't I thought about? What would an expert in this area add? Be specific.

96 Improve the structure

→ Rewrite this document with better structure and flow. Use headings, subheadings, and logical paragraph breaks. The content should feel organised and easy to scan. Document: [paste]

97 Generate alternatives

→ I currently do [task] in [current way]. Give me [5] alternative approaches I could use instead. For each: how it works, its main advantage, and its main disadvantage.

98 Rate and improve my writing

→ Rate this writing on a scale of 1–10 for: clarity, conciseness, professionalism, and persuasiveness. For each score below 8, explain specifically what is weak and how to fix it. My writing: [paste]

99 Simulate a conversation

→ Simulate a conversation between me and [person/role] about [topic]. They should ask tough questions and raise real objections. I want to practice my responses. Start the conversation from their opening question.

100 The universal improve prompt

→ Review this [email/report/document/message] and improve it. Focus on: clarity, tone, structure, and impact. Show me the improved version and briefly explain the 3 most important changes you made. Original: [paste]

You now have 100 prompts.

Use them. Customise them. Build your own variations.

The more context you give AI, the better the output.

Every hour you save is yours to use however you want.
